🔗 Portfolio

Profile

Front-End Developer specializing in **Angular**, **TypeScript**, and **RxJS**, with hands-on experience building scalable enterprise banking applications. Passionate about developing clean, maintainable, and user-centric web applications while collaborating in Agile cross-functional teams.

Experience

Front-End Developer - Suez Canal Bank

07/2025 – Present

Cairo, Egypt

- Develop and **maintain** enterprise Angular applications for digital banking solutions serving SME and Doctors loan journeys.
- Build reusable, scalable UI components while following clean architecture and best practices.
- Translate business requirements into intuitive user interfaces for complex **banking customer journeys** and **workflow-driven** processes.
- Integrate frontend applications with RESTful APIs and collaborate closely with backend, QA, UX, and business teams.
- Write and maintain **unit tests using Jest** to improve code quality and ensure application reliability.
- Optimize application performance, state management, and user experience across multiple banking modules.
- Participate in code reviews, bug fixing, sprint planning, and Agile development practices.

Education

9-Month Professional Diploma, Professional Training Program,

10/2024 – 07/2025

Information Technology Institute (ITI)

Giza, Egypt

Web User Interface Track (MEAN Stack) Smart Village Branch

Bachelor's Degree in Computer and Information Science,

2018 – 2022

Faculty of Computer and Information sciences Ain shams University

Cairo, Egypt

Skills

Frontend

Angular, TypeScript, RxJS, Tailwind CSS, PrimeNG, HTML5, CSS3, SASS, Bootstrap

UI/UX Tools & Soft Skills

Figma, Adobe Photoshop, Adobe Illustrator, Miro, Git, GitHub, Postman, Agile (Scrum), Problem Solving, MockFlow Teamwork, Good Communication

Backend

Node.js, Express.js, MySQL, MongoDB

Programming Language

JavaScript, TypeScript, C++, C

Projects

SME Digital Customer Journey

Enterprise digital banking platform enabling SMEs and doctors to apply for business loans through a seamless digital customer journey

- Developed the **Eligibility page** using Angular Reactive Forms and Signal Forms to validate customer information and route users to the appropriate SME or doctor's loan application journey.
- Implemented and enhanced the **Document Upload** module, including validation, support for **additional documents**, and the ability to **re-upload** documents after RM review and rejection.
- Developed the Loan Calculator to help customers estimate loan amounts, monthly installments, and total repayment before applying.
- Built reusable Angular components using **PrimeNG** and the bank's internal **SCB Component** Library, ensuring consistency with enterprise UI standards.
- Implemented **image optimization** techniques to improve application performance, loading speed, and SEO.

SME Loan Workflow Management

Internal banking workflow system for processing SME loan applications across multiple approval stages and banking roles.

- Developed workflow features for multiple banking roles, including **Relationship Managers (RM)**, **Credit Analysts (CA)**, **Team Leads**, and **Documentation Officers**.
- Enhanced the **Documentation Officer** workflow by enabling document **approval and rejection** actions instead of view-only access.
- Refactored shared modules into reusable components and centralized business logic using **Form Builders** and **Mappers**, improving maintainability and code consistency.
- Optimized application performance through component refactoring and code structure improvements.

Movie App

- A movie browsing app with search, image slider, and pagination.
- Tech Stack: React.js | React Router | Context API | Bootstrap CSS Animations
- Live Demo [🔗](#) GitHub [🔗](#)

Yummy Food Discovery App

- Helps users discover and explore new food recipes.
- Tech Stack: HTML5 CSS3 | Bootstrap | JavaScript | jQuery | FontAwesome
- Live Demo [🔗](#) GitHub [🔗](#)

UI/UX Redesign of a Hospital Website

- Redesigned the user interface of a hospital website to enhance usability and overall user experience.
- Tech Stack: Figma | UX Research | UI Design | Prototyping.
